

EmboSafe

VALVED, SPLITTABLE SHEATH DILATOR

Reduce the Risk of Air Embolus and Blood Loss

AngioDynamics' EmboSafe[®] valved, splittable sheathed dilator is a valved introducer available for dialysis catheters. This proprietary valve reduces the risk of blood loss and air intake while allowing for smooth catheter insertion. The EmboSafe dilator requires no change in insertion technique, features a low profile sheath handle, and provides reliable peel performance. The EmboSafe dilator is available in sterile packages of five for 14F, 15F, and 16F sizes.

Description	Units/Box	UPN
EmboSafe 14F	5	H787065076015
EmboSafe 15F	5	H787065076025
EmboSafe 16F	5	H787065076035

IMPORTANT RISK INFORMATION

INDICATIONS FOR USE: The EmboSafe valved, peelable introducer sheath is intended for use in the percutaneous insertion of pacing leads or catheters in the venous system.

CONTRAINDICATIONS: The EmboSafe valved peelable introducer sheath is not designed for use in the arterial system or as a hemostatic device.

CAUTION: Federal (USA) law restricts these devices to sale by or on the order of a physician.

WARNINGS AND PRECAUTIONS: The EmboSafe valved peelable introducer sheath is designed to reduce blood loss and the risk of air intake but it is not a hemostasis valve.

Please see package insert for complete list of warnings and precautions.
