Treat varicose veins with the full spectrum of VenaCure products.
The Basic Endovenous Ablation Procedure Pack from AngioDynamics is a slimmed-down kit perfect for venous ablation practices in need of select supplies. The Basic Endovenous Ablation Procedure Pack from AngioDynamics includes the following components, for serious phlebectomy, with all pieces achieving the high quality standards of VenaCure products from AngioDynamics.

### BASIC PROCEDURE PACK CONTENTS:
- One (1) needle 27
- One (1) 8 oz. denture cup
- One (1) probe cover
- One (1) U drape
- One (1) 32 oz. bowl
- One (1) scalpel #11
- Two (2) towel clamps
- One (1) 40 oz. PVP bottle
- Twenty (20) sponges
- One (1) backtable cover
- One (1) drain marker
- Two (2) ultrasound gel
- One (1) extra-large gown
- One (1) 10cc syringe
- One (1) 10cc syringe
- One (1) needle counter
- One (1) spinal needle
- One (1) Chloraprep
- One (1) extra-large gown
- One (1) prep sponge
- Six (6) OR towels
- One (1) 10cc syringe
- One (1) 10cc syringe
- One (1) needle 18
- One (1) 10cc syringe
- One (1) OR towel
- One (1) 20cc syringe
- One (1) 20cc syringe
- One (1) needle 25
- One (1) 40 oz. PVP bottle
- Twenty (20) sponges
- One (1) backtable cover
- One (1) needle 25
- One (1) 32 oz. bowl
- One (1) scalpel #11
- One (1) half drape
- One (1) scalpel #11
- One (1) Steristrip
- Ten (10) blank labels
- One (1) 32 oz. bowl
- One (1) scalpel #11
- One (1) OR towel
- One (1) 32 oz. bowl
- One (1) scalpel #11
- One (1) half drape
- Two (2) ultrasound gel
- Ten (10) blank labels
- One (1) 32 oz. bowl
- One (1) scalpel #11
- One (1) OR towel
- One (1) 32 oz. bowl
- One (1) scalpel #11
- One (1) half drape
- Two (2) ultrasound gel

The Premier Endovenous Ablation Procedure Pack from AngioDynamics features everything today’s provider needs to perform venous ablation with the precision of VenaCure. The Premier Endovenous Ablation Procedure Pack from AngioDynamics includes the following components, for serious phlebectomy, with all pieces achieving the high quality standards of VenaCure products from AngioDynamics.

### PREMIER PROCEDURE PACK CONTENTS:
- One (1) needle 27
- One (1) 8 oz. denture cup
- One (1) probe cover
- Ten (10) blank labels
- One (1) backtable cover
- One (1) 32 oz. bowl
- One (1) scalpel #11
- Two (2) ultrasound gel
- Two (2) 20cc syringes
- One (1) spinal needle 22
- One (1) extra-large gown
- One (1) 10cc syringe
- One (1) 10cc syringe
- One (1) needle counter
- One (1) spinal needle
- One (1) Chloraprep
- One (1) extra-large gown
- One (1) prep sponge
- Five (5) OR towels
- One (1) 10cc syringe
- One (1) 10cc syringe
- One (1) needle 18
- One (1) 10cc syringe
- One (1) OR towel
- One (1) 32 oz. bowl
- One (1) scalpel #11
- One (1) half drape
- Two (2) ultrasound gel
- Ten (10) blank labels
- One (1) 32 oz. bowl
- One (1) scalpel #11
- One (1) OR towel
- One (1) 32 oz. bowl
- One (1) scalpel #11
- One (1) half drape
- Two (2) ultrasound gel

The Standard Endovenous Ablation Procedure Pack from AngioDynamics features the essentials for venous ablation, with all pieces achieving the high quality standards of VenaCure products from AngioDynamics.

### STANDARD PROCEDURE PACK CONTENTS:
- One (1) needle 27
- One (1) 8 oz. denture cup
- One (1) probe cover
- Twenty (20) sponges
- One (1) backtable cover
- One (1) drain marker
- Two (2) ultrasound gel
- One (1) extra-large gown
- One (1) 10cc syringe
- One (1) 10cc syringe
- One (1) needle counter
- One (1) spinal needle
- One (1) Chloraprep
- One (1) extra-large gown
- One (1) prep sponge
- Six (6) OR towels
- One (1) 10cc syringe
- One (1) 10cc syringe
- One (1) needle 18
- One (1) 10cc syringe
- One (1) OR towel
- One (1) 32 oz. bowl
- One (1) scalpel #11
- One (1) half drape
- Two (2) ultrasound gel
- Ten (10) blank labels
- One (1) 32 oz. bowl
- One (1) scalpel #11
- One (1) OR towel
- One (1) 32 oz. bowl
- One (1) scalpel #11
- One (1) half drape
- Two (2) ultrasound gel

The Phlebectomy Procedure Pack from AngioDynamics includes the integral components for for venous phlebectomy, with all pieces meeting the high standards expected from VenaCure products from AngioDynamics.

### PHLEBECTOMY PROCEDURE PACK CONTENTS:
- One (1) needle 27
- One (1) 8 oz. denture cup
- One (1) probe cover
- One (1) half drape
- One (1) 32 oz. bowl
- One (1) scalpel #11
- One (1) 40 oz. PVP bottle
- Twenty (20) sponges
- One (1) backtable cover
- One (1) drain marker
- Two (2) ultrasound gel
- One (1) extra-large gown
- One (1) 10cc syringe
- One (1) 10cc syringe
- One (1) needle counter
- One (1) spinal needle
- One (1) Chloraprep
- One (1) extra-large gown
- One (1) prep sponge
- Six (6) OR towels
- One (1) 10cc syringe
- One (1) 10cc syringe
- One (1) needle 18
- One (1) 10cc syringe
- One (1) OR towel
- One (1) 32 oz. bowl
- One (1) scalpel #11
- One (1) half drape
- Two (2) ultrasound gel
- Ten (10) blank labels
- One (1) 32 oz. bowl
- One (1) scalpel #11
- One (1) OR towel
- One (1) 32 oz. bowl
- One (1) scalpel #11
- One (1) half drape
- Two (2) ultrasound gel

The 400 Micron Perforator & Accessory Vein Ablation Kit (PVAK) is a 400 micron optical fiber side in SV access and positioning. 21G venous access needle ensures easy, atraumatic access. 3/32” white loaded tungsten wire, bare access veins with a floppy tip and a thin anchor to guide sheath and hold in place.

**ANGiODyNAMiCS FIBERS**

**NEVERTOUCH DIRECT® FIBER**
- Gold-tip fiber reduces the need for contact with the vein wall, minimizing perforations of the vein wall and reducing the risk of perforation.
- Gold-tip maximizes ultrasonic visibility.

**NEVERTOUCH GOLD-TIP FIBER**
- Gold-tip fiber reduces the need for contact with the vein wall, minimizing perforations of the vein wall and reducing the risk of perforation.
- Gold-tip maximizes ultrasonic visibility.

**400 MICRON PERFORATOR & ACCESSORY VEIN ABLATION KIT (PVAK)**
- 400 micron optical fiber side in SV access and positioning.
- 21G venous access needle ensures easy, atraumatic access.
- 3/32” white loaded tungsten wire, bare access veins with a floppy tip and a thin anchor to guide sheath and hold in place.

**SPOTLIGHT ONE-PIECE SHEATH (OPS) PROCEDURE KIT**
- Tungsten-loaded sheath tip allows for easy sheath placement, while the smooth, soft, atraumatic tip and low profile make it easy to navigate.
- Unique self-dilation technology eliminates the need for a separate dilator, resulting in fewer components, fewer exchanges, and potentially faster procedures.

**ANGiODyNAMiCS FIBERS**

**NEVERTOUCH DIRECT® FIBER**
- Provides some benefits as the NeverTouch fiber, with an atraumatic tip for sheathless introduction.
- Allows physicians to advance to the nephronphilephorous junction without the use of a TIE-Sheath in appropriate patients.
- Allows physicians to gain access, advance the fiber and treat a diseased vein without the placement of a second guidewire.
- May result in faster procedures and fewer components.

**NEVERTOUCH GOLD-TIP FIBER**
- Gold-tip fiber reduces the need for contact with the vein wall, minimizing perforations of the vein wall and reducing the risk of perforation.
- Gold-tip maximizes ultrasonic visibility.

**400 MICRON PERFORATOR & ACCESSORY VEIN ABLATION KIT (PVAK)**
- 400 micron optical fiber side in SV access and positioning.
- 21G venous access needle ensures easy, atraumatic access.
- 3/32” white loaded tungsten wire, bare access veins with a floppy tip and a thin anchor to guide sheath and hold in place.

**SPOTLIGHT ONE-PIECE SHEATH (OPS) PROCEDURE KIT**
- Tungsten-loaded sheath tip allows for easy sheath placement, while the smooth, soft, atraumatic tip and low profile make it easy to navigate.
