Have Visibility. Have Control.

**Super-Elastic Nitinol Shaft** provides excellent torque control, flexibility, kink resistance, control, and maneuverability.

**Highly Lubricious Coating** reduces friction during wire advancement and placement.

**Smooth Parabolic Tip Taper** facilitates efficient, atraumatic placement through tortuous anatomy.

**Tungsten Wound Coil Tip** enhances visibility during placement under fluoroscopy.

**Super-Elastic Nitinol Shaft** provides excellent torque control, flexibility, kink resistance, control, and maneuverability.

**IMPORTANT RISK INFORMATION**

**INDICATION FOR USE:** The Nit-Vu® High-Performance Micro Guidewire is designed to facilitate the placement of devices for diagnostic and interventional procedures.

**CAUTION:** Federal (USA) law restricts these devices to sale by or on the order of a physician. For single use only.

**CONTRAINDICATIONS:** These guidewires are not intended for PTCA use.

**WARNINGS AND PRECAUTIONS:** This device is not intended for use in the coronary arteries or the neurovasculature. Reuse of single-use devices creates a potential risk of patient or user infections. Contamination of the device may lead to injury, illness or death of the patient. Reprocessing may compromise the integrity of the device and lead to device failure. Please see package insert for complete list of warnings and cautions.
